LINE LAZER

Provide fast, accurate results with the best line marking machines for today's road marking products.

The Line Lazer 3400 is ideal for smaller jobs. Although capable of painting only one line at a time, it's size, light weight and new features make the Line Lazer 3400 ideal for maintenance work, car parks etc.

Line Lazer 3900 & 5900 deliver precise and consistent lines. Designed to operate with single or twin gun. The performance of these versatile line marking machines meet the requirements of local authorities and towns making them ideal for car park, road and airport marking.

The Line Lazer 3900 & 5900 can be offered as standard or mounted with the Auto-Layout function.

Auto-Layout takes away the painstaking work of laying out the premark for parking bays or roads. Simply program the machine, press the remote button to premark then simply connect the dots!

Other variations in the range include the Line Lazer Hydraulic and the Line Driver, which transforms the Line Lazer into a ride-on, push and pull hydrostatic driver. The Line Driver doubles production rates and improves line quality while reducing operator fatigue.

Other Line Lasers available. Please contact Ennis Prismo for further information and full specifications of the complete Line Lazer range.

High pressure jet easily blasts away sand and dirt and is less affected by wind

Key Benefits

- Sprays solvent, water or rubber based paints without thinning
- Single or twin gun options available
- Integrated setting device for both solid and broken lines
- Offers considerably less overspray than air spray systems
- High powered, petrol driven Honda engine
- Hard chrome stainless steel piston pumps for a longer working life
- Detachable guns for stencilling and all general painting jobs
- Speedy gun rotation makes it easy to alternate from marking lines to spraying curves instantly

GRINDLAZER

The GrindLazer is the solution for all your line marking removal requirements. It has been designed to minimise end user fatigue and drastically reduced vibration whilst effectively removing lines from just about any surface.

THERMOLAZER

The ThermoLazer is a user-friendly, innovative thermoplastic line marking machine. Designed to melt down and apply almost all thermoplastic marking materials. Ideal for single lines, double lines or stencilling on car parks, airports, roads etc.

COLOURSAFE

Anti-slip surface coating

A quick and cost effective way of increasing pedestrian safety and producing an effective anti-slip surface for car parks, walkways, cycleways and many light traffic applications.

Covering Capacity	2 coats @ 300 microns wet film thickness gives 32.5m ² per 16 litre drum*
Drying Time	ASTM wheel dry time 15-20 minutes
Shelf Life	6 months
Surface Preparation	Clean, dry and free from oil or fuel contamination
Flash Point	4°C
Application	Brush, roller, squeegee or aggregate spray machine

*Please note different textured finishes may provide varying practical coverage rates, always carry out a test patch.

Available in the following standard colours

Yellow, bold red, venetian red, grass green, blue, purple and black in 16 litre drums. Colours may vary from shown. Other colours to order. Colour swatches available.

Key Benefits

- Suitable for asphalt or concrete (see below*)
- Cost effective way to create a bright, vibrant, anti-slip surface
- Easy to apply no specialist equipment required

Typical Applications

Car parking bays	Cycle lanes
Footpaths	Ghost islands
Many more light traffic application	

*Please note ColourSafe is not suitable for uncompacted asphalt eg playgrounds and tennis courts. A test area is always recommended before proceeding with the main application.

WATERPROOF CLOTH MASKING TAPE

Waterproof cloth masking tape is ideal for masking off white lines, ironwork and kerbs prior to laying anti-skid materials, colouring or resurfacing work on paths and carriageways
